DETAILED ACTION

1. Claims 11-19 are allowed.

Reasons for Allowance

2. The prior art of record fails to teach or to fairly suggest a behind-the-head headband specifically constructed so as to comprise:

at least one transducer;

a behind-the-head headband having a first and second contact location for contacting the temporal bone of a wearer;

adjustable spacing between the transducer and first or second contact portion; the behind-the-head headband having a first portion and at least a second portion, each of which coming together at a predetermined angle;

and specifically wherein the transducer is displaceable along the length of the second portion in such a way that the spacing between the transducer and the first or second contact portions, as well as the spacing between the behind-the-head headband and the head of the wearer is also adjusted, as specifically recited and connected with the other elements recited in claims 12-19.

Discussion Of Relevant Prior Art:

E.B. Nowosielski (U.S. Patent 1,560,718)

Nowosielski fails to teach or fairly suggest a “behind-the-head” headband, and further fails to teach that the transducer’s displacement along the length of the second

portion (3) affects a spacing between the headband (8,9) and the head of the wearer as required.

R. A. Weeks (U.S. Patent 3,053,944)

Weeks fails to teach or fairly suggest a “behind-the-head” headband; fails to teach such a member having a first and second contact location for contacting the temporal bone of a wearer; and further fails to teach that the transducer’s displacement along the length of the second portion (8) affects a spacing between the headband (2) and the head of the wearer as required.
